## SECTION 5 – FIREFIGHTING MEASURES

**Suitable Extinguishing Media:** Water spray, alcohol resistant foam, dry chemical or carbon dioxide  
**Unsuitable Extinguishing Media:** Solid water jet ineffective as extinguishing medium.  
**Exposure Hazards:** Not flammable or combustible.  
**Combustion Products:** Hazardous decomposition products formed under fire conditions include carbon oxides.  
**Advice for firefighters:** Use self-contained breathing apparatus (SCBA) operated in positive pressure mode and complete protective clothing. Cool tanks/drums with water spray/remove them into safety. Do not move the load if exposed to heat. Take account of toxic fire-fighting water. Use water moderately and if possible collect or contain it.

## SECTION 6 – ACCIDENTAL RELEASE MEASURES

**Personnel precautions:** Use personal protective equipment. Avoid breathing vapors, mists or gas. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low area.  
**Environmental precautions:** Prevent further leakage or spillage if safe to do so. Do not let product enter drains.  
**Methods for cleaning spills:** Discard any product, waste, container or wrapper available in an appropriate manner as not to harm the environment, according to federal regulations, state and local.

## SECTION 7 – HANDLING AND STORAGE

**Handling:** Avoid contact with skin and eyes. Avoid inhalation with vapor or mist. Use proper personal protective equipment as indicated in Section 8.  
**Storage:** Store at room temperature. Hygroscopic; store in a dry area. Keep container in a well-ventilated place. Keep locked up. Provide for a tub to collect spills. Unauthorized persons are not admitted. Meet all legal requirements.

## SECTION 8 – PRECAUTIONS TO CONTROL EXPOSURE / PERSONAL PROTECTION

**EXPOSURE LIMITS:**  
Expressed in ppm

Component	USA WEEL
Propylene Glycol	10 mg/m TWA

**Engineering Controls:** Provide mechanical ventilation or direct exhaustion to the external media. It is recommended safety shower and eye bath available near work site.  
**Monitoring:** Maintain breathing zone airborne concentration below exposure limits.

### PERSONAL PROTECTIVE EQUIPMENT (PPE):

**Eye Protection:** Avoid contact with eyes; wear splash-proof chemical goggles, face shield, safety glasses (spectacles) as may be appropriate for exposure.  
**Respiratory Protection:** Prevent inhalation. Use in a well-ventilated location. Ensure airflow and air changes. Use local exhaust ventilation to remove airborne contaminants from employee breathing zone and to keep contaminants below levels listed above. With normal use, the Exposure Limit Value will not usually be reached. When limits approached, use respiratory protection equipment.
